

BATTERY LIFTERS

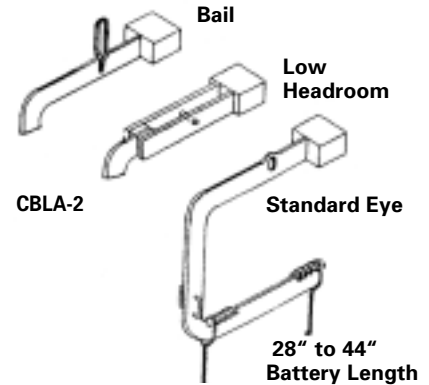

BATTERY LIFTERS

SLINGMASTER battery lifters are designed and engineered to handle a wide range of battery sizes and weights. Manufactured from high strength alloy steel, they offer a multiple selection of pick-up hooks which allow you to choose the proper hook or combination of hooks to meet your specific requirements. All units utilize replaceable polyester (acid resistant) straps that are non-conductive. Each battery lifter is individually proof tested, has an ID plate and is painted safety yellow with the capacity marked on both sides. Design factor is 5 : 1 unless otherwise specified.

MODEL CBLA NON-CONDUCTIVE (Adjustable)

C-hook type battery lifters are designed for use where the roll bars on the lift truck are not slotted for the entry of a regular hoist. Batteries can be easily handled from either side. A wide selection of steel hooks or a combination of steel hooks and non conductive polyester straps are available to meet your individual requirements. Three types of top lifting lugs are available to meet any headroom restrictions.

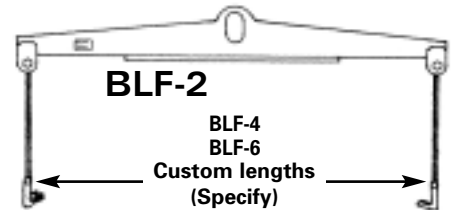

MODEL BLA NON-CONDUCTIVE (Adjustable)

This low headroom non-conductive, adjustable beam type battery lifter is lightweight and easy to handle. Adjustable to handle batteries from 28" to 44" in length with a wide selection of hooks available to meet your individual requirements.

MODEL BLF NON-CONDUCTIVE (Fixed Length)

This low headroom non-conductive, beam battery lifter is lightweight and easy to handle. Custom designed to fit one specific battery size, it is our most economical model. A wide selection of hooks are available to meet your individual requirements.

MODEL BS NON-CONDUCTIVE SLING

This 2 leg polyester Battery sling is ideal for field service and maintenance personnel. Lightweight and easy to store, it has a 5000 lbs. rated capacity with a 4 ft. reach. It comes with a wire hook and a flat hook on each leg providing you with all the flexibility required to handle all types and sizes of batteries. **BISON can design, manufacture, test and certify a battery lifter to meet your specific requirements.**
