# AIR BALANCERS, LIFT TABLES, PATENTED RAIL SYSTEMS

BISON is a stocking distributor for Knight Industries, a leading manufacturer of ergonomic lift assist equipment and overhead bridge crane systems and accessories. This is preferred equipment in the automotive industry where the lightweight and easy motion results in greater productivity, with minimized operator fatigue, in repetitive motion, high volume situations. The unique design, combined with state of the art manufacturing techniques and high quality components, result in long, reliable service in the most demanding industrial environments.

In our fully equipped showroom, we can demonstrate the ease with which your product could be handled with a Knight system. Please call our customer service department for detailed information about these superior, material-handling products.

**ALUMINUM RAIL**

**NYLON WHEEL TROLLEYS OFFER A LOW FRICTION, ERGONOMIC RUNNING SURFACE**

**STEEL RAIL**

## LIFT AND ROTATE TABLES

Other table types include lift, tilt, lift and tilt, slide tilt, corner tilt, double scissor lift, zero load, platform lift and turntable. Tables use exclusive air bag and pneumatic control technologies. The most advanced safety features are included along with a variety of controls and options.

**LIFT & ROTATE TABLE**

**AIR LIFT BALANCER**

## AIR BALANCERS

The "free float" feature of balancers allows 2 handed load manipulation in a zero gravity condition, making them particularly suited to assembly operations. When used with aluminum or steel rail and their low friction trolleys, load handling just doesn't get any easier!

Please consult with one of our sales or engineering representatives for assistance with your application.
